Add a printer using IP address or hostname

Find a printer by other options

○ My printer is a little older. Help me find it.

○ Find a printer in the directory, based on location or feature

○ Select a shared printer by name

Browse...

Example: \\computername\printername or
http://computername/printers/printername/.printer

● Add a printer using an IP address or hostname

○ Add a Bluetooth, wireless or network discoverable printer

○ Add a local printer or network printer with manual settings

Next   Cancel

Type a printer hostname or IP address

Device Type: **Autodetect**
Hostname: See sticker on printer

Device type:	Autodetect ▾
Hostname or IP address:	NAS_AIH_HP607.msu.montana.edu
Port name:	NAS_AIH_HP607.msu.montana.edu

☑ Query the printer and automatically select the driver to use

Autodetect detects WSD and TCP/IP printers.
To search for IPP printers, please select IPP from the drop down box

Additional port information required

The device is not found on the network. Be sure that:

1. The device is turned on.
2. The network is connected.
3. The device is properly configured.
4. The address on the previous page is correct.

If you think the address is not correct, click Back to return to the previous page. Then correct the address and perform another search on the network. If you are sure the address is correct, select the device type below.

Install the printer driver

Choose your printer from the list. Click Windows Update to see more models.

To install the driver from an installation CD, click Have Disk.

If you don't see HP in the Manufacturer list, select Windows Update (this step will take several minutes).

Manufacturer	Printers
Adobe	Adobe PDF Converter
Canon	
Generic	
Microsoft
